HARVARD WIT +
WOMEN IN TECHNOLOGY + ALLIES

Below please find some of our current hottest IT openings around the university.
All of these positions are being actively recruited for.   Please spread the word!

School/Department	Requisition Number	Position Title	Grade Level	Job Summary	Contact
Harvard Graduate School of Education	52795BR	Manager, Instructional Technologies	57	This manager is primarily an individual contributor but may also lead and directly supervise staff assigned to work on projects related to instructional technology. The person ensures the successful resolution of instructional technology service requests and incidents. This position additionally provides relevant training and documentation to faculty, staff, and students. The role involves considerable technical and analytical skillsets capable of supporting integration efforts, troubleshooting, incident resolution, vendor management, and some code development sufficient to address customization, branding, and accessibility requirements of HGSE.	Lisa Maxwell, lisa_maxwell@gse.harvard.edu
Harvard Graduate School of Education / Center on the Developing Child	52731BR	Digital Solutions Developer	57	This position is a key role in both initiating and supporting communication and knowledge management activities in service of the mission of the Center. This position is part of the Center's five-person communications team and is responsible for leading and implementing the Center's digital strategy, overseeing the continuous updating and expansion of our web presence and other digital tools in order to maximize the impact of the knowledge generated by the Center and its affiliates. Minimum five years' experience in progressively responsible digital content development and management. Experience with website development and ongoing website management, experience with user-centric design and mobile optimization.	Maureen Donahue, maureen_donahue@gse.harvard.edu
Harvard University Faculty of Arts and Sciences, Human Evolutionary Biology	52610BR	Computational Biologist	56	Seeking a computational biologist to support a cutting-edge ancient DNA lab at Harvard focused on studying the genetic history of people who lived up to 20,000 years ago.	Kim Zweig, zweig@fas.harvard.edu
Harvard University Faculty of Arts and Sciences, Minda de Gunzburg Center for European Studies	52679BR	Information Technology Manager	56	The IT Manager is responsible for overseeing the information technology structure and evolving technological needs of the Minda de Gunzburg Center for European Studies (CES) and its primary constituencies (faculty, staff, students, and visiting scholars). Must have 3 years IT experience.	Ben Norton, bnorton@fas.harvard.edu

Department	Req ID	Job Title	Grade	Description	Contact
Harvard University Faculty of Arts and Sciences, Research Computing	52709BR	Senior Research Computing Facilitator	58	Seeking a Sr. Research Computing Facilitator to advise researchers in the best use of a broad set of state-of-the-art cloud systems, tools, and software to enable research productivity. Training researchers to thrive on IaaS, PaaS, and SaaS platforms will expand our institution's world-renowned research in Science, Engineering, Public Health, Social Science and Education.	Kim Zweig, zweig@fas.harvard.edu
Harvard University Faculty of Arts and Sciences, Research Computing	52718BR	Senior Systems Software Developer	58	Seeking a Sr. Systems Software Developer to help design, implement various internal cloud technologies (incl. Openstack, OpenShift, and Ceph) to provide University researchers with a robust, production quality, platforms and services for computing, storage, and software. This position will join a multi-institutional team in the newly formed project called the New England Research Cloud (NERC) with Leads and Directors of Research Computing at Harvard FAS and Boston University.	Kim Zweig, zweig@fas.harvard.edu
Harvard University Faculty of Arts and Sciences, Research Computing	52733BR	Associate Director of Research Computing Systems Software	59	Seeking an Associate Director of the Systems Software Group to drive the development and adoption of leading practices in site reliability engineering within FAS Research Computing (FASRC). This position will provide leadership and expertise in designing and implementing a suite of tools and services to support Operations Team in maintaining, deploying, and securing the vast server infrastructure across three datacenters. This position will join the management team in FAS Research Computing and report to the University Research Computing Officer.	Kim Zweig, zweig@fas.harvard.edu
Harvard University Faculty of Arts and Sciences, Research Computing	52775BR	Research Software Engineer	56	This position will support researchers' software engineering and data management needs. Through regular engagements with researchers, the RSE will help with software engineering projects that may include scientific R code development and maintenance, data visualization, data wrangling, data management, creating independent software modules, and documenting software.	Kim Zweig, zweig@fas.harvard.edu
Harvard University Information Technology	52563	Senior Applications Engineer, Operational Technologies	58	The Senior Applications Engineer, Operational Technologies will support applications and systems within HUIT's Operational Technology portfolio. Operational Technologies (OT) are technologies that monitor or control things in our physical environment. They include such things as: building control systems, industrial control systems, lab monitoring and control systems, etc. This position is part of a team providing support for existing OT systems, and involved in deploying new OT systems. You will be part of a talented team of engineers that demonstrate superb technical competency, delivering mission critical systems and ensuring the highest levels of availability, performance and security.	Brian M. Thibeault, brian_thibeault@harvard.edu
Harvard University Information Technology	52561	Senior API Platform and Solutions Developer	58	The Senior API Platform and Solutions developer will work as part of a team to implement complex API platform and business solutions. The developer will work to develop comprehensive API, web portal, and API platform solutions for complex projects; meet with customer to understand their API requirements and convert them into working solutions; work toward meeting departmental goals and engage in cadences to ensure success of the API platform Services, and, work with cross domain teams to deploy code, understand their solution and provide guidance on solutions.	Brian M. Thibeault, brian_thibeault@harvard.edu

Harvard University Information Technology	52560	Manager of Library Software Engineering	59	Reporting to the Managing Director for Library Technology Services, the Manager of Library Software Engineering is a member of a high-performing leadership team which focuses on development and implementation of world-class solutions to fulfill the mission of the Harvard Library: to advance scholarship and teaching through the collection, creation, application, preservation, and dissemination of knowledge. This is an ideal opportunity to work at the intersection of scholarship and technical innovation, and in an organization that values creativity, collaboration and diverse perspectives and backgrounds.	Brian M. Thibeault, brian_thibeault@harvard.edu
